Total Hours Spent	38	
Project Progress	93.00	%

Task Management Velocity

The length of Sprint 3 was 18 days. Our combined total hours was 38. The most important aspect of this sprint was to rework our UI and login page with our React implementation and finish up our documents. As a result, that took up the most of our actual hours spent while the actual time needed for finishing up our documents was expected.

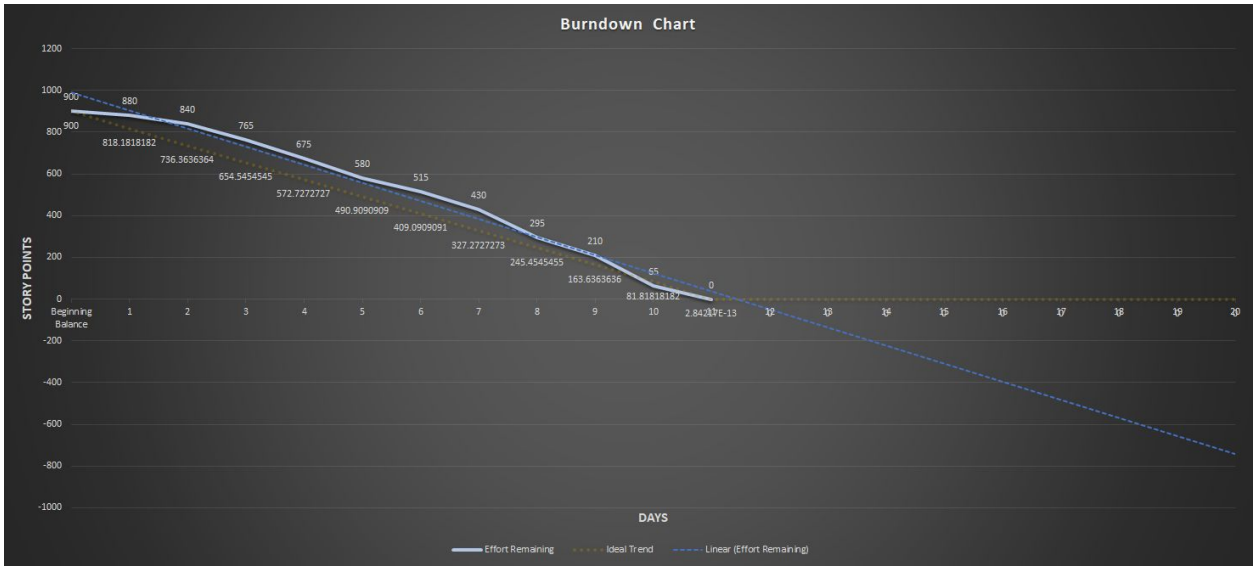
As a system admin, I want to be able to add a Guest User so that they can become an Account User. (2 points)
11/13 - Sprint #3 Starts
As a system admin, I want to be able to delete an Account User so that Account cannot be used. (2 points)
As a system admin, I want to be able to update the details of my application so that the application will keep updated details always. (2 points)
As a guest user, I want to be able to register for an account so that I can become an Account User and use the Account User's features. (13 points)
As an account user, I want to be able to login to the system so that I can

Burndown Chart



Sprint Retrospective

Did we meet our Sprint Goal?

- Yes, a lot of this sprint was focused on restructuring the login page to get it deployed and we were able to start gathering data for searching recipes

What was the team's velocity?

- 38 Hours combined, with the focus on restructuring our login page

How did the Sprint Burndown look?

- Similar to before, a linear workflow of our deliverables and tasks being done. No signs of being behind schedule.
