Task Management Velocity

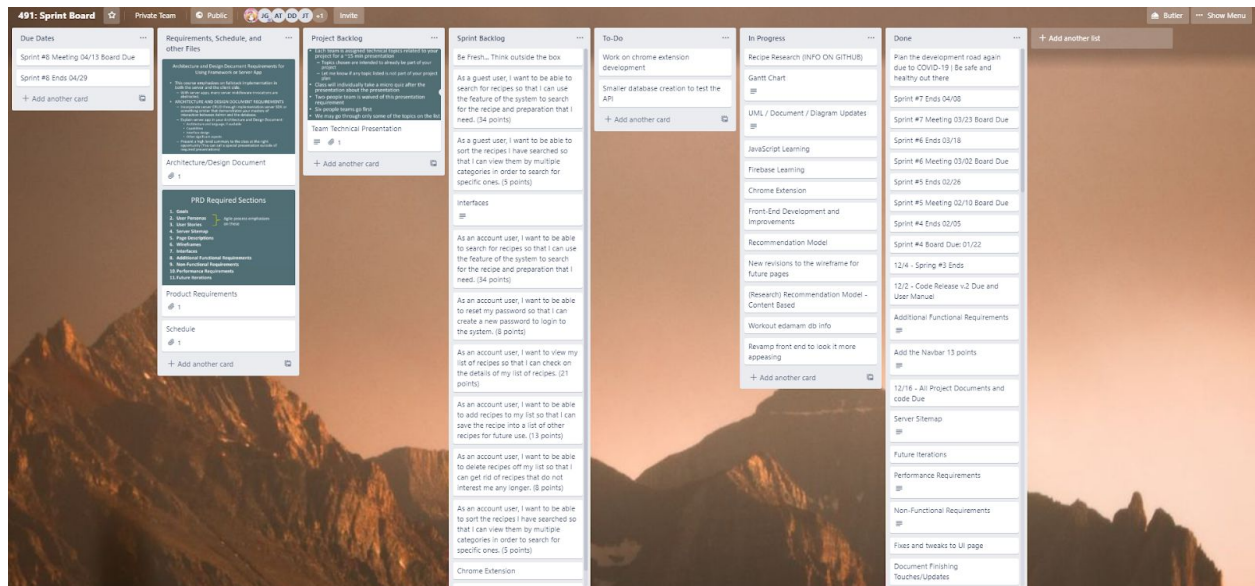

The length of Sprint 7 was 16 days. Our combined total hours was 43. Most of the tasks from the previous sprint were met during this sprint. Unfortunately, our group was still feeling the effect of the transition so we weren't completely satisfied with the amount of work we put into this sprint but regardless, it was still progress that we had hoped for.

Burndown Chart

Sprint Retrospective

Did we meet our Sprint Goal?

- Mostly; most of the sprint was continuing on with what we were working on last sprint

What was the team's velocity?

- 43 Hours

How did the Sprint Burndown look?

- Within this sprint, we were above the curve after several previous sprints being under.

Despite this, we are still feeling the conditions of the class transition so we were hoping to get quite a lot more work. Still, it is still progress.
