Total Hours Spent

42

Project Progress

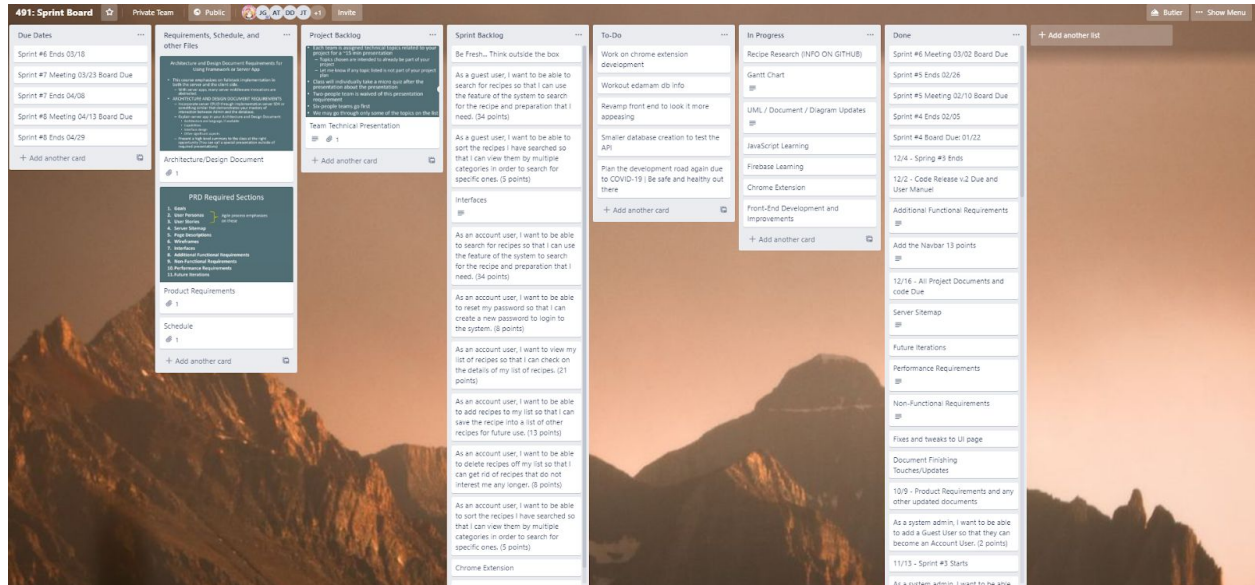

86.00 %

Task Management Velocity

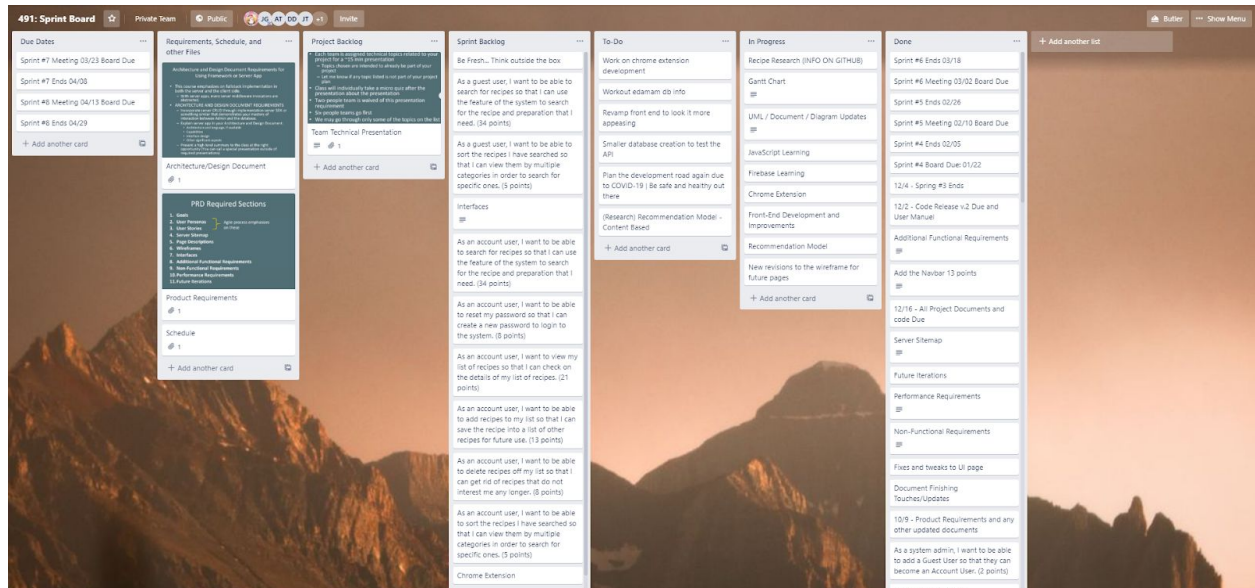

The length of Sprint 6 was 17 days. Our combined total hours was 42. The transition from face-to-face to online has affected the overall workflow of the team, thus less work has been done within this sprint with a couple of tasks being delayed. However, none of our tasks has been neglected as we're still trying to work towards the implementation of the features but the transition has caused some delay.

Burndown Chart

Sprint Retrospective

Did we meet our Sprint Goal?

- Somewhat; we weren't able to meet most of our expectations of this sprint due to time and other complications, but we made progress

What was the team's velocity?

- 42 Hours

How did the Sprint Burndown look?

- Compared to the other two sprints, we're slowly getting back on progress despite the delay caused by the transition of classes. Our main objective for this sprint was to mainly continue what was leftover from the previous sprint, resulting in a closer curve.
