2.) To continue click on the button “Login” and receive the window prompt.

The image shows a web application interface. At the top, a white toast notification box with a thin border displays the text "look-n-cook.firebaseio.com says" in a small font, followed by "Successfully signed up" in a slightly larger font. A blue button with the text "OK" is positioned in the bottom right corner of the notification. Below the notification, the login form is visible. It consists of a text input field containing the email address "testemail@mail.com". Below this field is the label "Password" in a green, monospace-style font. Underneath the password label is another text input field, currently filled with seven black dots to represent a masked password. At the bottom of the form are two green rectangular buttons with white text: "Login" on the left and "SignUp" on the right.
