Sprint Backlog

- As a user, I want easy accessibility and readability of the recipe so that I don't have to search hard for what I need. (21 points)
- As a user, I would like no distractions or pop-ups that get in the way of my recipe instructions so that I can have a smooth cooking experience. (5 points)
- As a user, I would like to view recipes sorted by multiple categories (culture, calories approximations, the time required, meal types, etc) in order to easily search for certain recipes. (21 points)
- As a user, I would like to view the approximate calorie count of the meal that I am making in order to keep track of my daily caloric intake. (5 points)
- As a user, I want to view the cooking utilities that I would need in order to complete the specified meal. (13 points)
- As a user, I want to save recipes that I like into a list in order to view and use them again in the future. (3 points)
- As a user, I want to be able to see possible recipes I can make based on the ingredients I already have in order to get recipe ideas. (5 points)
- As a user, I want a friendly and visually appealing UI in order to have a nice cooking experience. (13 points)
- As a user, I would like to see a simple menu for sorting out different cultural foods as well as a sorting feature for cooking time in order to categorize which kinds of recipes I'd like to make. (8 points)
- As a user, I want a system that gives alternate ingredient suggestions in order to be more flexible with a recipe in case I don't have specific ingredients. (8 points)
- As a user, I want a method to tell how difficult the recipe is to make in order to help decide which recipes I can make based on my skill level. (3 points)
- As a user, I want to see large-displayed pictures for the recipe in order to help me decide which recipe to make at a glance. (3 points)
- As a user, I want to have food suggestions based on what I cooked in order to try other foods similar to ones that I've just made. (5 points)
- As a user, I want a sorting system of allergies so that I can avoid recipes I may be allergic to. (5 points)
- As a user, I want to be able to track more than one recipe at a time in order to cook multiple recipes efficiently. (5 points)
- As a system admin, I want to be able to add a Guest User so that they can become an Account User.

As a system admin, I want to be able to delete an Account User so that Account cannot be used.

As a system admin, I want to be able to update the details of my application so that the application will keep updated details always.

As a guest user, I want to be able to search for recipes so that I can use the feature of the system to search for the recipe and preparation that I need.

As a guest user, I want to be able to sort the recipes I have searched so that I can view them by multiple categories in order to search for specific ones.

As a guest user, I want to be able to register for an account so that I can become an Account User and use the Account User's features.

As an account user, I want to be able to search for recipes so that I can use the feature of the system to search for the recipe and preparation that I need.

As an account user, I want to be able to reset my password so that I can create a new password to login to the system.

As an account user, I want to be able to sort the recipes I have searched so that I can view them by multiple categories in order to search for specific ones.

As an account user, I want to view my list of recipes so that I can check on the details of my list of recipes.

As an account user, I want to be able to delete recipes off my list so that I can get rid of recipes that do not interest me any longer.

As an account user, I want to be able to add recipes to my list so that I can save the recipe into a list of other recipes for future use.

As an account user, I want to be able to login to the system so that I can use the features of the system to accomplish what I need.
